

Windham Technical Advisory Committee Minutes  
DRAFT

November 8, 2006  
7:00 p.m.

Attendance: Police Chief Gerald Lewis, Gary Dallas, Greg Cappiello; Jacques Borcoche and Eric DeLong

Excused: Alan Carpenter, and Carl Heidenblad

Meeting called to order at 7:08 p.m.

Items taken up by the group:

1. A discussion by Chief Lewis on the new installation of a state-funded digital radio system was held. Best geographical placement of the transmitters was discussed. Thoughts on how to save Town monthly expenses on 4 frame-relay connections were put forth and the group will research alternatives. The group had the good fortune to have Town resident Gary Dallas as a guest expert. Gary is a radio expert, designed the original analog Town radio system and was a founding member of the TAC.
2. Eric discussed his adding increased bandwidth and a static IP to the Town FIOS connection, completely paid for by savings on un-utilized T1 line channels.
3. Minutes of the October 11, 2006 meeting were approved.

The meeting adjourned at 8:15 pm.
